

Executive Report

FinancialData reconstruction status as of 2026-07-08.

Pipeline reconstructed

78%

Analytical datasets

3 reconstructed

Figures

15 regenerated

Models

3 OLS specifications

What is now real

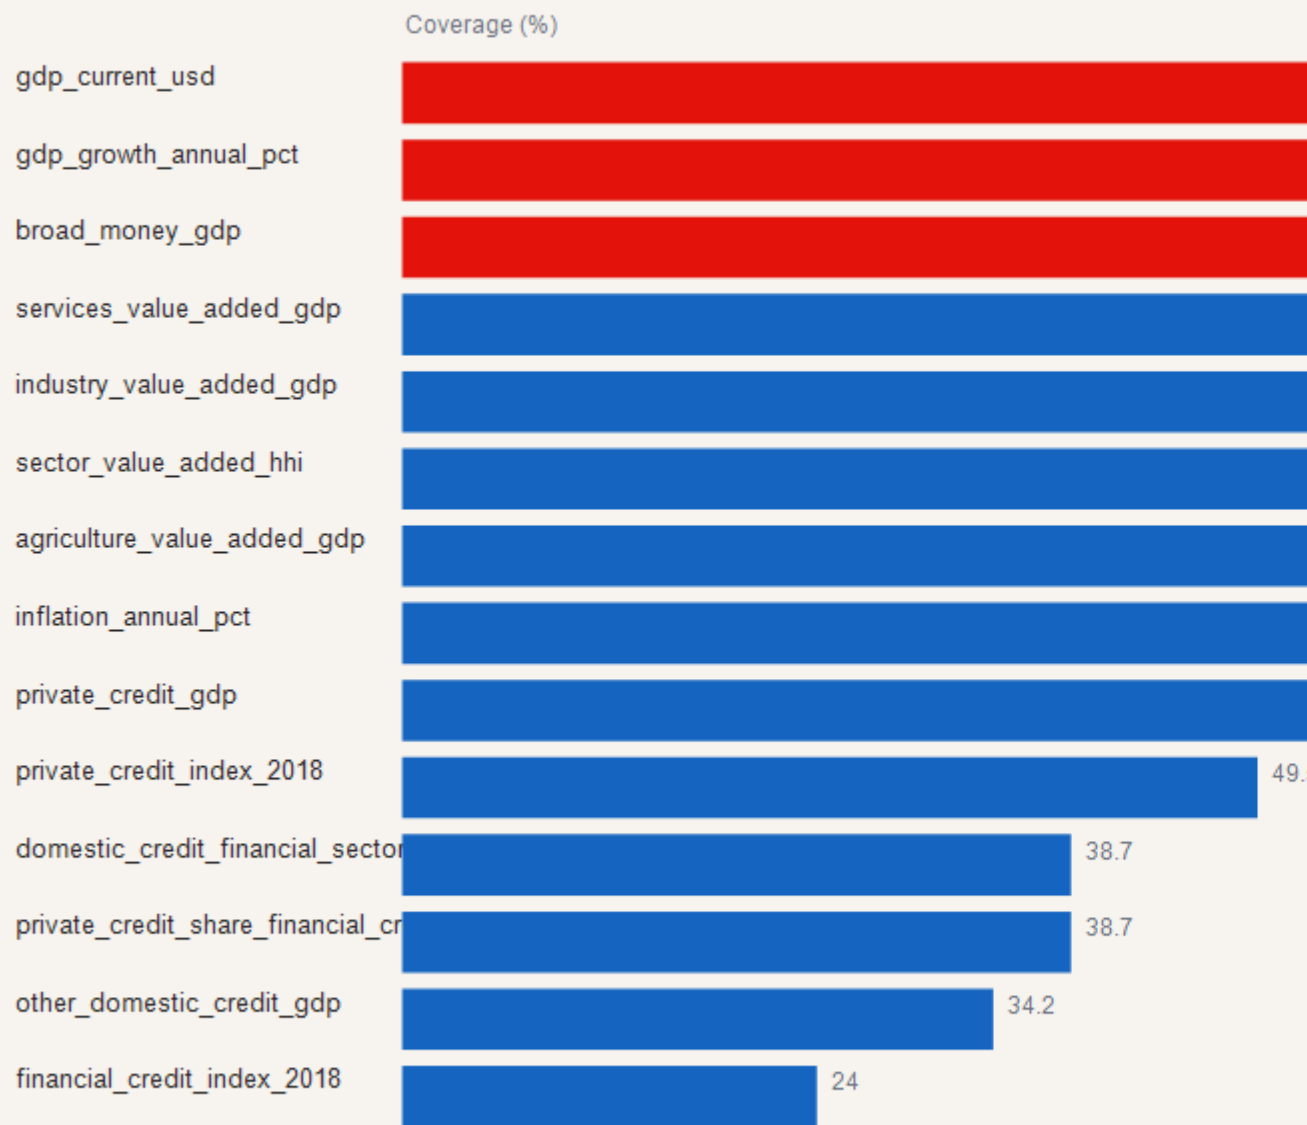

The repository now produces real public-data outputs: an annual macro-financial panel, credit-depth equivalent table, sectoral economic-structure table, figures, tables, econometric diagnostics, a static dashboard, and reports. No statistical result is fabricated.

What remains partial

The exact legacy monthly `CreditType` and sector-credit `EconomicSector` panels remain partial because the source workbooks and backup files used by the original scripts were not committed. The pipeline records which country-regulator downloads succeeded and which endpoints moved or failed.

Data coverage by variable

Non-missing share in the reconstructed WDI panel.

Source: World Bank WDI; calculations by repository pipeline.

Coverage of reconstructed variables.

Recovery Status

dataset	reconstructed	output	source	limitation
PanelCompleto	yes	data/processed/PanelCompleto.reconstructed.csv	World Bank WDI annual macro-financial panel	Equivalent annual panel, not exact lost monthly regulator merge.
CreditType	partial/equivalent	data/processed/CreditType.reconstructed.csv	World Bank WDI credit-depth indicators plus regulator-source download audit	No product-level regulator split unless original workbooks are manually harmonized.
EconomicSector	partial/equivalent	data/processed/EconomicSector.reconstructed.csv	World Bank WDI sector value-added indicators	Economic structure, not sectoral credit allocation.
Regulator raw sources	attempted	data/raw/public_sources and data/metadata/source_download_status.csv	Legacy country regulator URLs	Some official URLs changed, moved, or returned unavailable.
